OBJECTIVES

Senior Computer Science specializing in Penetration Testing and Security Infrastructure, Web Security. Highly proficient in Linux environments and network defense, backed by practical mastery of the Hack The Box Pentester path. Experienced in building secure administrative systems using PHP and AJAX. A proactive problem-solver with a 3-year background in community management, seeking to contribute to a professional security team to identify vulnerabilities and implement robust defense strategies

PROFESSIONAL EXPERIENCE

- **National Telecommunication Institute - NTI**
Fortinet Cybersecurity, **Apr 2026**
 - Deployed and configured a full security stack featuring a FortiGate Next-Generation Firewall (NGFW) integrated with Windows Server for centralized management.
 - Implemented strict firewall policies, VPN configurations, and secure session management to protect network infrastructure.
 - Maintained network integrity and mitigated potential threats using advanced firewall features and system hardening techniques.
- **National Telecommunication Institute - NTI**
Ethical Hacking, **Mar 2025**
 - Conducted end-to-end penetration testing on lab environments, from reconnaissance using Nmap to exploitation using Metasploit and Burp Suite.
 - Demonstrated the exploitation and mitigation of OWASP Top 10 vulnerabilities, including XSS, SQL Injection, IDOR, and Path Traversal.
 - Assessed network infrastructure and web applications to identify security flaws and perform comprehensive vulnerability assessments.
- **National Telecommunication Institute - NTI**
Network Security, **Sep 2024**
 - Designed comprehensive secure network architectures implementing robust AAA (Authentication, Authorization, and Accounting) using RADIUS and TACACS+ servers.
 - Hardened network devices by configuring Extended Access Control Lists (ACLs), disabling unused ports, and implementing Port Security.
 - Configured secure routers, switches, and VPNs across TCP/IP architectures to ensure continuous data confidentiality and availability.

EDUCATION

Mansoura University
Bachelor, Statistics and Computer Science, **2022 - 2026**
GPA 2.4

CERTIFICATIONS

- Cloud and Virtualization Concepts, MaharaTech – ITIMoooca.
- Computer Network Fundamentals, MaharaTech – ITIMoooca.
- Cybersecurity For Beginners, MaharaTech – ITIMoooca.
- Ethical Hacking, MaharaTech – ITIMoooca.
- Python Programming, MaharaTech – ITIMoooca.
- Implementation of Computer Network Fundamentals, MaharaTech – ITIMoooca.
- Introduction to network security, MaharaTech – ITIMoooca.
- Network Virtualization Concepts, MaharaTech – ITIMoooca.
- Red Hat System Administration I, MaharaTech – ITIMoooca.

PROJECTS

- **Enterprise Security Infrastructure** **July 2025**
 - Deployed and configured a full security stack featuring a FortiGate Next-Generation Firewall (NGFW).
 - Integrated the firewall with Windows Server to ensure centralized management and administration.
 - Implemented strict firewall policies, VPN configurations, and secure session management to harden the network.
- **Web Security & Vulnerability Labs,** **April 2025**
 - Developed several web applications using PHP and HTML specifically to practice and demonstrate exploitation techniques.
 - Mitigated OWASP Top 10 vulnerabilities, including XSS, SQL Injection, IDOR, and Path Traversal.
 - Conducted end-to-end penetration testing on local labs, from Nmap reconnaissance to exploitation using Metasploit and Burp Suite.
- **Advanced Cisco Network Design,** **May 2025**
 - Designed a comprehensive secure network architecture using Packet Tracer.
 - Implemented robust AAA (Authentication, Authorization, and Accounting) using RADIUS and TACACS+ servers.
 - Hardened network devices by configuring Extended Access Control Lists (ACLs), disabling unused ports, and implementing Port Security.

SKILLS

- **Cybersecurity & Pentesting:** Ethical Hacking, Network Penetration Testing, Web Application Security (OWASP Top 10), Vulnerability Assessment, Linux Hardening.
- **Networking & Infrastructure:** TCP/IP, OSI Model, Secure Router & Switch Configuration, VPNs, Firewalls (FortiGate), RADIUS, TACACS+, ACLS.
- **Security Tools:** Nmap, Burp Suite, Metasploit, Wireshark, Packet Tracer.
- **Programming & Web Development:** Python (Scripting), PHP, HTML5, CSS3, JavaScript, Java, C++, AJAX, SQL.
- **Operating Systems:** Linux (Command Line, Advanced System Administration), Windows Server (Active Directory basics).
- **Interpersonal Skills:** Community moderation, Conflict resolution, Analytical Problem Solving, Remote Collaboration, Continuous Learning, Adaptability.
- **Languages:** English B2, Arabic Native

Volunteering

- **CIS Team**
Support Member, **Sep 2024 –Sep 2025**
 - Assisted and followed up with team members on their assigned tasks, providing proactive support and troubleshooting to resolve any technical or project-related issues.
 - Served as a primary liaison between the instructor and team members, facilitating communication, managing schedules, and delivering regular progress report.
- **Undergraduate Scientist**
Media Design Head **Jun 2024 – oct 2024**
 - Headed the Media Team, overseeing the content strategy and production process for the team's social media platforms to ensure alignment with page requirements.
 - Collaborated with team members to create and publish engaging content, providing clear creative direction and detailed requirements to maintain high-quality standards.
